

The Cambridge Introduction to Literature and the Environment (Cambridge Introductions to Literature)

The degrading environment of the planet is something that touches everyone. This book offers an introductory overview of literary and cultural criticism that concerns environmental crisis in some form. Both as a way of reading texts and as a theoretical approach to culture more generally, ecocriticism is a varied and fast-changing set of practices which challenges inherited thinking and practice in the reading of literature and culture. This introduction defines what ecocriticism is, its methods, arguments and concepts, and will enable students to look at texts in a wholly new way. Boxed sections explain key critical terms and contemporary debates in the field with hands-on examples and comparisons. Timothy Clark's thoughtful approach makes this an ideal first encounter with environmental readings of literature.
