

The Main Experiment

Its hard, fast, suspenseful the pace will make you sweat THE TRIBUNE At Hadley Plant nuclear centre, deep in the English countryside, Martin Higgs works behind closed doors on secret experiments, hidden from the public eye. Together with his colleague, Sally Parks, Martins tirelessly experiments with new particles and scientific methods. But when the nuclear centres elusive benefactor Lord Honiton dies, Sally and Martin find themselves drawn even further into the mystery of the Plant. Why do even they know so little about the particle they are working with? There is something wrong with these experiments This particle can alter the way people think. BIRMINGHAM POST Christopher Hodder-Williams was an English writer, mainly of science fiction, but he wrote novels about aviation and espionage as well. Before his career in writing, Hodder-Williams joined the army in 1944, and served in the Middle East and lived in Kenya and New York, later settling in the UK. Many of his books are early examples of what would later be called techno-thrillers. He also worked as a composer and lyricist, and wrote numerous plays for television.
