

Hiding From Lizards

Hiding From Lizards- the poignant story of a young, East Texas girls search for the true meaning of family, uncovers emotions and struggles often hidden from sight while dealing with a life that is always changing. When the sunbeam shown through the kitchen door... her mama died. For many, the 1950s were happy times, but not for Brenda Kay. October 1953 changed everything. People Brenda loved seemed to die when she wasn't looking and, unfortunately, her dear, sweet mama was one of them. Brenda Kay was determined not to lose one more soul and that included her daddy most of all. She was bound and determined not to let the lizards take him too. But that determination met an obstacle she hadn't prepared for on account of her daddy picking up and going to Houston, leaving her in the care of relatives. To make matters worse, there was a woman on the hunt for a husband and she had her sights set on Brenda's daddy. Desperate to hang on to the only real family she had left in life, Brenda has to rid herself of the lizards that haunt her--the images only she can see, visual reminders of the fears that torture her. With loss a constant in her small Texas town, the answers she seeks will not come easily, but they are there if she allows herself to truly see.
